

Raw Data Sheets - DATA TABLE 1

My Bags	BRAND	TYPE	REP	SIZE	Time	Micro	CF	Bag Weight	Popcorn Weight	# Burned	# Popped	# Kernels
1												
2												
3												
4												
5												

Repeat from above

My Bags	BRAND	TYPE	REP	SIZE	CF	Time	Micro	Popcorn Size 1	Popcorn Size 2	Popcorn Size 3	Popcorn Size 4	Popcorn Size 5
1												
2												
3												
4												
5												

Brand = ORSP, ORKK, ORB, PS, AB; Type = Butter, Light or Kernel Korn; Replicate = 1-5; Size = oz; Correction Factor as appropriate for comparison; Time Popped; Microwave

Data Table 2: Kernel Size Measurements

--Note these are additional/different measurements from those used in Table 1--

Replicate	ORSP Bag # _____	ORKK Bag #1 _____
1		
2		
3		
4		
5		
6		
7		
8		
9		
10		
11		
12		
13		
14		
15		

Note: We will not "sample with replacement" and thus will use different pieces of popcorn for the overall bag mean vs. and examination within one bag. If you popped an OR bag, then bring in an additional 15 pieces to measure. If you did not happen to get an OR bag, then you will need to get this data from someone else.
